

T⁺SCHUDIN[®]

CENTERLESS GRINDING

CVP:

We provide machinery to manufacture smallest & slender components

SWISS  - style.

Highest accuracies ($< 1 \mu\text{m}$)

Lowest part costs

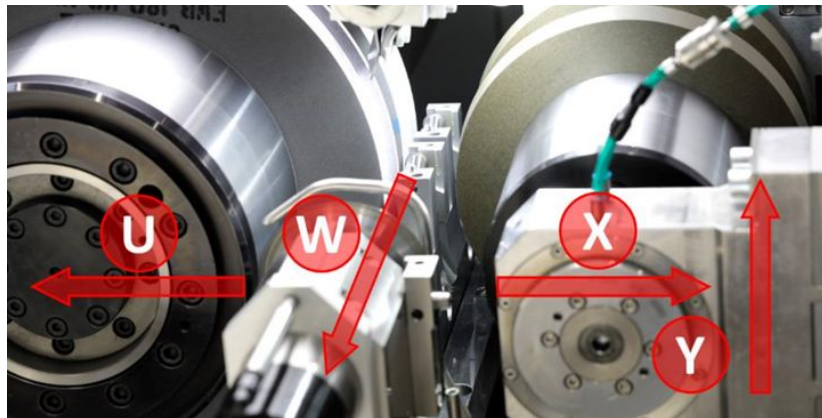

Minimum TCO

Here is WHY!

Our machine solutions feature maximum operator support because they find the most economical machine settings, such as part height, work-rest angle and RPM-settings (roundness), in the fastest possible way and set these automatically for you via our US-patented most innovative machine kinematics!

! Patented 3-axis
EP 1330336
US 7223159

! Patented Y-axis
EP 2394783,
US 9085059

For people who know their way around centerless grinding, this is a real game changer! Save time! Save on production costs and achieve the highest precision in just one process step – not in three consecutive steps. We determine with you the TCO (total cost of ownership) as your key decision criterion for a machine investment!
